SUMMARY

Software Engineering graduate with experience in Python, Java, and C++. Throughout my education and personal projects, I have developed data-driven applications by focusing on computer vision, deep learning, and web scraping technologies. By participating in R&D-oriented team efforts, I gained practical experience in all stages of project development from concept to completion. I deliver value in collaborative environments by combining my technical skills with strong communication abilities. I am focused on adapting to innovative technologies and continuously advancing my professional competencies.

TECHNICAL SKILLS

Languages: Python, Java, C++, SQL, JavaScript

AI & Data Science: TensorFlow, Keras, OpenCV, YOLOv5, Scikit-learn, Pandas, NumPy

Web & Tools: Selenium (Web Scraping), Git, GitHub, Linux, VS Code, REST APIs

Soft Skills: Agile Methodology, Problem Solving, Technical Communication, Team Collaboration

PROJECTS

University Data Integration and Smart Preference Platform | *Python, Selenium, Data Analysis, R&D* Jan. 2026 – June 2026

- Developed an end-to-end, data-driven platform to optimize university preference processes for a capstone project.
- Built a Python/Selenium web scraping architecture to automatically collect and clean large-scale official datasets.
- Integrated an AI-powered smart wizard and recommendation algorithms to guide undecided students dynamically.
- Managed the entire project lifecycle from requirements to testing, conducting active software development and R&D.

Car Brand Classification with Deep Learning | *Python, TensorFlow, Keras, CNN*

Dec. 2025

- Built a high-accuracy classification system using **TensorFlow/Keras**, optimizing **CNN** and **VGG16** with data augmentation.

Smart Traffic Light Management System | *Python, YOLOv5, OpenCV*

Nov. 2025

- Developed a real-time vehicle density detection system using **YOLOv5** and **OpenCV** to dynamically optimize light durations.

EXPERIENCE

TBK Bilisim Sistemleri A.S.

Ankara, Turkey

Software Engineering Intern

June 2025 – Sept 2025

- Conducted **R&D** activities to design and develop a mobile application for university data visualization.
- Collected and processed large datasets of university statistics to build the application's backend infrastructure.
- Collaborated with the development team to optimize software performance and ensure data accuracy.

Hilton Boston Dedham

Dedham, MA, USA

Work and Travel Participant (House Attendant)

June 2024 – Oct 2024

- Worked as a House Attendant, demonstrating strong work ethic and adaptability in a fast-paced hotel environment.
- Significantly improved English proficiency through daily interaction with international colleagues and cultural immersion.

EDUCATION

Istanbul Atlas University | *B.S. in Software Engineering (100% English)*

Istanbul, Turkey

- English Preparatory Program (2021 – 2022)
- Bachelor's Degree

Sept. 2021 – June 2026 (Expected)

CERTIFICATIONS

- Boğaziçi Defense Industry Summit** – Active Participant in defense tech seminars.
- IBB Young Volunteer Program** – Active Volunteer in community projects.
